PROFESSIONAL SUMMARY

Graduate Cybersecurity Professional with a Bachelor of Cyber Security from Deakin University. Experienced in security automation, memory forensics, threat hunting, and delivering digital web solutions. Proven ability to analyse complex system vulnerabilities, automate operational workflows, and translate requirements into functional, secure platforms. Seeking a starting role in security operations (SOC) to protect and defend enterprise environments.

EDUCATION

Bachelor of Cyber Security | Deakin University, Melbourne

Feb 2023 - Feb 2026

High Distinction grades: Cyber Security Analytics, Database Fundamentals, Responsive Web Apps, Professional Practice in IT, Intro to Data Science/AI.

Distinction grades: Cyber Security Forensic Investigation, Secure Coding, Malware Analysis, Network Forensics.

TECHNICAL SKILLS

Languages & Scripting: Python, Bash, PowerShell, SQL, HTML/CSS, JavaScript

Security & Forensics Tools: Splunk SIEM, Volatility 3, Wireshark, tcpdump, tshark, aircrack-ng, Nmap, Autopsy, Metasploit, John the Ripper, OWASP ZAP, Nikto

Infrastructure & Admin: Active Directory, Windows Server, Linux, Git/GitHub, Jenkins CI/CD, SonarQube, Redis

Processes & Frameworks: Agile Scrum, NIST Framework (SP 800-82 OT), SOCI Act, MITRE ATT&CK, technical reporting

CYBERSECURITY & ENGINEERING PROJECTS

Website Developer (Internship) — WERS

Oct 2025 - Dec 2025

- Redesigned and customised the digital portal for Whitehorse Emergency Relief & Support, improving community access. *Awarded Community Impact Award.*
- Authored comprehensive technical handover documentation and presented outcomes directly to organisation stakeholders.

Capstone — AppAttack Security-Automation Toolkit

Mar 2025 - May 2025

- Engineered modular Python parsers for Nmap XML, Metasploit, and John the Ripper, formatting outputs into structured JSON database feeds.
- Co-designed a Bash automation runner script to coordinate discovery, vulnerability scanning, and local credentials audits.

Active Directory & Splunk SIEM Ingestion Lab

Jun 2026

- Deployed a virtualised domain (homelab.local) using Windows Server 2022 as a Domain Controller and a Windows client system.
- Automated employee account creation and OU structures using custom PowerShell scripting.
- Simulated brute-force credential attacks, audited Windows Event IDs (4625/4740), and ingested logs to Splunk SIEM via Universal Forwarder.

PROFESSIONAL EXPERIENCE

Customer Service / Console Operator — BP Australia, Melbourne

Apr 2025 - Present

- Accurately process cash and EFTPOS transactions, balancing POS terminals under tight financial compliance standards.
- Proactively monitor live CCTV feeds, alarm panels, and fuel console systems to ensure strict compliance with emergency response protocols and WHS guidelines.

CERTIFICATIONS & ACTIVITIES

- **Google Cybersecurity Certificate (7 Modules Completed):** Foundations, Network Security, Linux & SQL, Threat Management, Detection & Response, Python Automation.
- **Mastercard Cybersecurity Job Simulation (Forage):** Designed and analysed phishing email simulations (2024).
- **Forage Client Services Job Simulation:** Completed data analysis and presentation tasks (2024).
- Deakin University FreelancingHUB Community Impact Award (awarded for WERS website redesign project).

- Athletics and Football School Representative (leadership and teamwork roles).
